

smartKIT transmission oil for DSG, automatic and CVT transmissions

EXAMPLE ITEM*

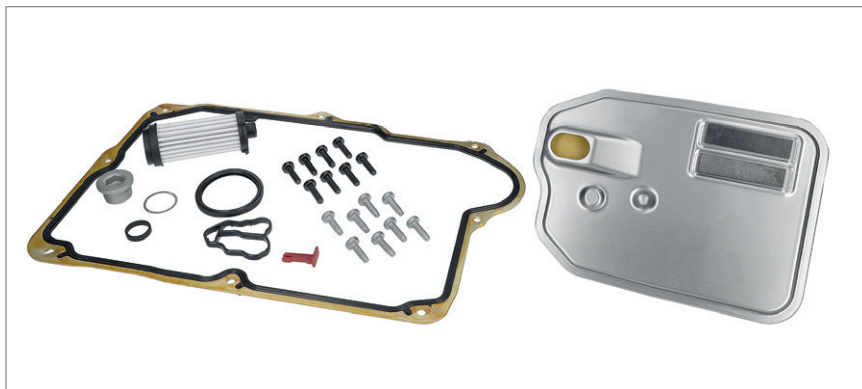

AIC item no.: 74779Set | OE ref no.: 246 377 0495

AIC Germany
offers gear oil sets
for all common vehicle
types in Europe.

FROM COMPETENCE **TO EXCELLENCE.**

Example item*

One click – one kit. Order quickly, save time.

An oil change isn't rocket science and can be done quickly by a professional. It's also no secret that the filter, seals, and drain plug should also be replaced at the same time. However, the ordering process for all the required individual parts often takes almost as long as the actual job under the lift itself. It's frustrating when

something is forgotten in the hustle and bustle of everyday life, or one part doesn't fit together. That's why AIC Germany offers transmission oil kits that contain all the parts required for an oil change, from German brand oil to the filter, seals, and drain plug – and can be ordered quickly and easily with just one click.

WHY CHANGE THE TRANSMISSION OIL?

Reduced wear: Fresh transmission oil minimizes wear on clutches and gears.

Improved shifting performance: Old oil can lead to jerky or delayed gear shifts.

Temperature resistance: Clean oil ensures better heat dissipation and reduces thermal stress.

Extended service life: Regular oil changes prevent transmission damage and increase mileage.

BENEFITS:

Complete solution: Contains all necessary components such as transmission fluid, seals, filters, and bolts.

Manufacturer-compliant quality: The kits comply with OEM specifications and protect the vehicle warranty.

Easy application: Perfectly tailored to all common vehicle models to simplify the maintenance process.

CONCLUSION:

Modern vehicles with DSG, automatic, or CVT transmissions require regular maintenance to ensure optimal performance and longevity. An AIC Germany smartKIT provides all the necessary components for an efficient and professional transmission fluid change.
